### PROFESSIONAL SUMMARY

Full Stack Flutter developer with 3 years of experience building complete cross-platform applications – from responsive UIs to powerful Firebase backends. Specialize in multi-vendor marketplaces, real-time service platforms, and messaging solutions for startups and growing businesses. Deliver end-to-end solutions including authentication, databases, cloud functions, push notifications, and real-time features using Firebase and REST APIs.

### TECHNICAL SKILLS

<b>Frontend (Flutter)</b>	Dart, Flutter, GetX, Provider, Responsive UI, Dark/Light Mode, Multi-language
<b>Backend (Firebase)</b>	Firebase Auth, Firestore, Realtime Database, Cloud Messaging (FCM), Crashlytics, Analytics, Cloud Functions
<b>APIs &amp; Tools</b>	REST API Integration, Google Maps SDK, Payment Gateways, Postman, Git
<b>Workflow</b>	Remote work flexibility, Clear documentation, Independent problem solving

### PROFESSIONAL EXPERIENCE

#### Freelance Full Stack Flutter Developer | Self-Employed 2022 – Present

- Delivered 6+ complete Flutter applications for clients in e-commerce, service, and messaging industries from concept to production.
- Built a multi-vendor marketplace platform (3 apps) handling 100+ vendors with real-time tracking and integrated payments.
- Developed a queue management system (2 apps: User, Admin) for a salon chain, using Firebase Realtime Database to reduce customer wait times by 60%.
- Created a one-to-one text messaging app with real-time chat using Firestore and push notifications via FCM.
- Reduced app crash rate by 30% through Firebase Crashlytics monitoring and proactive optimization.
- Maintained 95% client satisfaction through clear communication, regular updates, and on-time delivery.

### KEY PROJECTS

#### Lakmart – Multi-Vendor Marketplace Platform

3 apps: [User](#), [Vendor](#), [Delivery](#) | Full Stack (Flutter + Firebase)

- Built complete ecosystem from scratch; integrated real-time delivery tracking with Google Maps.
- Implemented loyalty and referral programs via Firebase – increasing user retention by 25%.

#### Barber Shop Queue Management System

2 apps: [User](#), [Admin](#) | Full Stack (Flutter + Firebase)

- Used Firebase Realtime Database to sync queue status instantly across apps.
- Reduced average customer wait time from 45 minutes to 15 minutes.

#### WhatsApp-Style Messaging App

Personal project demonstrating full-chat architecture

- Implemented one-to-one messaging with Firestore and real-time push notifications via FCM.

### TESTIMONIAL & EDUCATION

“Shamvil delivered our marketplace app on time and was very responsive. His ability to handle both the frontend and Firebase backend made the process smooth.” – **Nihana Niamath, Lakmart**

- Bachelor of Commerce (B.Com) – MIC Arts and Science College
- The Complete Flutter Development Bootcamp – Udemy (Dr. Angela Yu)
- Firebase Firestore Mastery – Official Course | Google Analytics for Mobile Apps
